## 1st Quarter

2024
March 31
To Our Shareholders, Customers, and Friends:

As we transition into 2024, inflation remains in the forefront, presenting a challenging environment for all. Housing, food, vehicles, fuel, and insurance continue to see prices higher than average inflation levels. Bond markets had originally priced in as many as six rate cuts to the Federal Reserve's overnight interest rates. Today, only two cuts remain, with some economists projecting no reductions in rates during all of 2024.

In the face of today's inflationary headwinds, we remain dedicated to our conservative fundamentals and low cost-of-funds model. These tenets allow the bank to provide safety, security, and convenience to our clients. Deposits are loaned in the communities we serve, with excess deposits invested in short-term US government guaranteed treasury and agency bonds.

Select Q1 2024 Highlights:

- Net income of $\$ 764$ thousand decreased $56.7 \%$ or $\$ 1.0$ million from the prior year's $\$ 1.7$ million. This change was largely related to a decline in excess deposits invested overnight with the Federal Reserve as well as reductions in interest income from investments, as the portfolio shrinks due to scheduled payments and maturities.
- Total loans increased $5.0 \%$ or $\$ 19.1$ million during the last twelve months.
- The average yield on the loan portfolio was $5.87 \%$ as of March 31,2024 , an increase of 45 basis points from the same period in 2023.
- Credit quality continues to be strong, with reserves against future credit losses remaining at $1.46 \%$ of total loans at quarter end.
- Total securities decreased $18.2 \%$ or $\$ 83.1$ million year-over-year, in line with contractual payments and maturities. No investment securities have been or are planned to be sold. All securities continue to be classified as available-for-sale and are reported at fair value.
- Total deposits declined $9.4 \%$ or $\$ 75.5$ million year-over-year, as customers invested excess funds in higher yield investment opportunities.
- Cost-of-funds increased to $1.28 \%$ as of March 31, 2024, increasing from $0.12 \%$ in the same period in 2023. This increase was due to the rapid escalation of rates by the Federal Reserve; however, the Bank's cost-of-funds remains well below industry averages in line with our low cost-of-funds model.

Throughout all economic cycles, the bank has remained focused on our customers and the communities we serve. From our founding in 1957 through the past ten economic recessions, our commitment has not changed. The bank remains well capitalized, with strong credit quality and liquidity.

While 2024 will continue to present economic challenges, the bank remains focused on assisting our customers navigate any adversities that may arise. The bank remains safe, solid, and secure.

Thank you for your continued support.
